

Finger Pulse Oximeter

For measurement of oxygen saturation (SpO2) and pulse rate (PR).

Major Features:

- Integrated with SpO2 probe and processing display module.
- Small in volume, light in weight and convenient in carrying.
- Operation of the product is simple, low power consumption.
- Pulse rate value display, bar graph display.
- Low-voltage indication: low-voltage indicator appears before working abnormally which is due to low-voltage
- Automatically power off function: when the device is under the state of measuring interface.
- It will automatically power off within 5 seconds if the finger falls out of probe.

CMS50B

Suitable for being used in family, hospital, oxygen bar, community healthcare, physical care in sports (It can be used before or after doing sports, and it is not recommended to use the device during the process of having sport).
