

PIL-BOB®

Makes it easy to get the pills out

Remove medication easily and hygienically without spillage

The Webstercare® Pil-Bob has been designed to make the removal of medication from Webster-pak® systems even easier.

The Pil-Bob is ideal for individuals who suffer from poor eyesight, arthritis or have poor dexterity, and suitable for aged care staff, self-medicating residents and carers helping people to administer medication. It has received favourable ergonomic review.

To use, insert the Pil-Bob tip into the blister compartment through the foil backing. Sweep it around the edge, allowing the medication to fall from the blister into the cup.

The advantages of Pil-Bob:

- Small and lightweight so it fits comfortably in your hand
- Durable plastic material makes it easy to clean and sterilise
- Centre tip with cup design prevents spilling or dropping medication
- Comes with OH&S instructions to ensure correct USE (see overleaf)

Don't forget Cytotoxic Pil-Bob®

Used specifically to remove cytotoxic medications from Webster-pak® systems and help reduce the risk of cross contamination between medications and users.

PIL-BOB[®]

Makes it easy to get the pills out

The Pil-Bob makes it even easier to remove pills hygienically and efficiently from Webstercare packs. **IMPORTANT:** Our experience shows if the Pil-Bob is used as indicated in the instructions it works very well. Please find below the instructions for use.

INSTRUCTIONS FOR USE:

STEP 1

Hold the Webster-pak folder in a horizontal (flat) position

STEP 2

Place the Pil-Bob behind the blister you wish to open

STEP 3

Insert the tip upwards through the foil backing

STEP 4

Sweep the blister with the serrated tip until all the pills drop out into the Pil-Bob cup

CAUTION: Swallowing pills directly from the Pil-Bob may result in injury due to the serrated tip. To avoid injury, transfer pills directly from the Pil-Bob into a disposable medication cup.
