Highly-absorbent,  
combine dressing

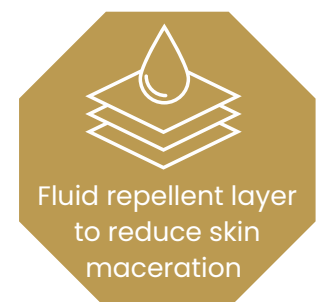

Melior Combine Dressing Pads are sterile, highly absorbent wound dressings that suit highly exuding wounds. These dressing pads feature a unique non-woven fabric that ensures gentle contact with the wound bed, reducing trauma and enhancing the comfort of patients with sensitive or healing wounds.

Constructed with superior absorbent materials, the Melior Combine Dressing Pads effectively manage exudate, helping reduce maceration of the peri-wound skin. This helps to promote wound healing and protect the peri-wound skin from further damage and breakdown.

The dressing pads are designed with a breathable, non-adherent surface to minimise friction and increased padding around the wound to protect it from environmental contaminants. The non-adherent surface reduces pain and discomfort during dressing changes, ensuring minimal disruption to the healing process. The flexible design allows easy application, making the pads suitable for various wound types.

It is ideal for use on significant cuts, active bleeding, first-aid, chronic wounds, and high-exuding wounds. The Melior Combine Dressing Pads are hypoallergenic and safe for individuals with sensitive skin or adhesive allergies. The gentle yet highly effective dressing ensures a comfortable, non-stick experience throughout the healing process.

# melior<sup>TM</sup>

Highly-absorbent,  
combine dressing

### Suitable For:

- Suitable for wounds with high exudate production
- It protects cuts, burns, and grazes without sticking them to the wound bed.

### Application:

The Melior Combine Dressing can be applied directly to the wound, making it ideal for highly exuding wounds. Its soft, breathable padding forms a protective barrier, helping to maintain a clean and moist wound environment while promoting optimal healing.

### Contraindications

- Seek medical advice immediately for all serious wounds and burns
- Not suitable for dry or low leaking wounds

Retains large amounts of exudate while maintaining a moist environment.

Non-adhesive, highly absorbent pad
