SAFETY DATA SHEET

Product Code: LIV1124158L

PAGE 1 OF 3

(SECTION 1 PRODUCT IDENTIFICATION

Product Name: Baxter Hartmann's Intravenous IV Fluids

Use The above solutions are simple fluids consisting of either electrolytes/sugars/amino acids or

combinations of such ingredients. They are used in a wide range of clinical conditions and may enter the body following intravenous administration. Alternatively, certain of these solutions are used to irrigate specific body cavities (the peritoneum) or organs (such as the bladder or joints in arthroscopy).

HAZARD IDENTIFICATION

In view of both the special design of the containers and the composition of the fluid within, any health hazard may be regarded as negligible. However, accidental spillage of the contents could result in eye irritation or general skin discomfort.

It is most unlikely in view of the dose presentation that any of these products could be either ingested or inhaled. However, in the unlikely event of this occuring, general irritation or emesis could occur.

n.a. = not applicable; n.d . = not defined; * = change.

COMPOSITION/INFORMATION ON INGREDIENTS

No information available.

SECTION 4 **FIRST AID MEASURES**

First Aid for Accidental Contact

If the solution comes into contact with the eyes, wash with copious quantities of water for Eye

at least 15 minutes.

Skin Following accidental skin contact, wash off with soap and water.

Ingestion In the case of ingestion of small quantities, no immediate action is required, but medical advice should

be sought. If large quantities are accidentally ingested, immediate medical advice should be sought.

The product as supplies presents no hazard to personnel who come in contact with it. In the event of a **Accidental Spillage** spillage, the solution should be mopped up with a suitable disposable material that should be disposed

of in accordance with the waste disposal guidelines described underSection 6.

(SECTION 5) FIRE FIGHTING MEASURES

Hazardous Thermal In the event of a fire in the warehousing area, thermal decomposition of the **Decomposition Products** solution may release water vapour and oxides of carbon.

> The plastic container, if allowed to burn will produce toxic fumes of carbon monoxide, carbon dioxide, nitrogen and hydrogen chloride. Heat build up may cause the container to rupture and spill its contents.

Any standard extinguishing mediia such as water spray, dry chemical, carbon monoxide or **Extinguishing Media**

foam may be used.
